phpMyAdmin Access

phpMyAdmin is an open source tool written in PHP intended to handle the administration of MySQL over the Internet. Currently it can create/drop/alter tables, delete/edit/add fields, execute any SQL statement, and manage keys on fields. To create / drop MySQL databases go to [MySQL management](#). **Important:** if you have just created new database it can take about 1 minute until phpMyAdmin starts working!

List of current databases:

» MySQL Database	» MySQL User	» phpMyAdmin
No MySQL databases, go to MySQL Management		

Change MySQL user password

Select MySQL user:

Enter new password:

Enter password again:

Manage MySQL Databases

MySQL databases are required by many web applications including bulletin boards, content management systems, and others. To use MySQL, you need to create database and user, which will be automatically assigned to this database. Click for [phpMyAdmin](#) when database is created.

Important: MySQL Host for any database in this account is [mysql15.000webhost.com](#), do not use localhost!

Create new database and user

MySQL database name: a9598033

MySQL user name: a9598033

Password for MySQL user:

Enter password again:

List of your current databases and users:

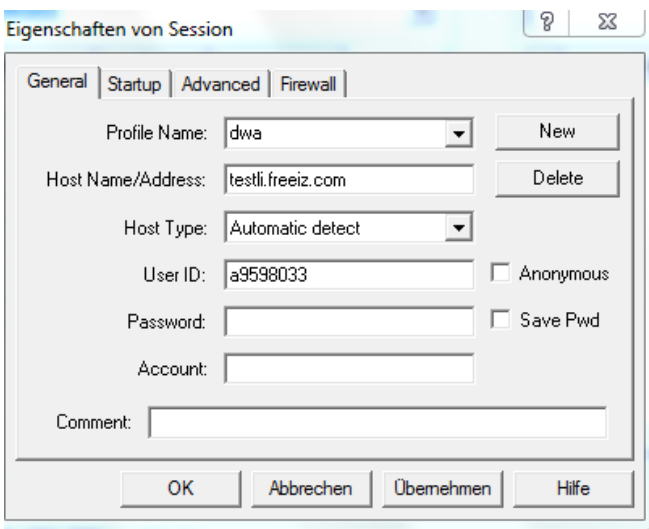

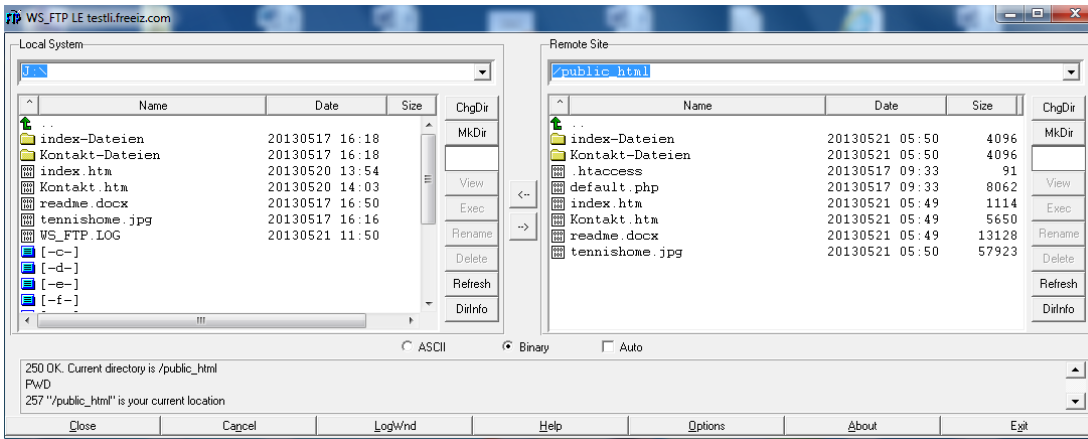

» MySQL Database	» MySQL User	» MySQL Host	» Action
